Celebrating Life Together

Price: \$8.95

Now, more than ever, the sacrament of marriage IS under attack. Many within our "secular" society endeavor to blur the definition and meaning of marriage. But as sacred Scripture and the Church teach, "Marriage is not purely a human institution despite the many variations it may have undergone through the centuries.. ." (CCC). Rather for Catholics, Christian marriages and Christian families are the foundational building blocks of a vibrant and dynamic Church and an essential ingredient in the propagation of the faith.

Celebrating Life Together is a fun, engaging study on a critically important subject. In addition, because young couples are often teachable and desirous of knowing how they can have a strong marriage, or receive help for their marriage, it is a great evangelization tool. Celebrating Life Together teaches that Christ is the foundation of marriage and that a personal response to Christ as Savior and Lord is essential to a happy marriage. Studying with a group who are not-believers and followers of Christ, will enable a Christian couple to develop redemptive relationships that will deepen and flourish, and hopefully bring the non-believing couple home to Christ.
